

## Architectural Services

Working directly with an architect is one of the most important aspects of planning and building your new home. We offer the services of one of DFW's most accomplished architects for the design of your new home. What does the architect provide for you?

Our architect will conduct a private interview to create a working profile that lists a priority of room adjacencies, features, room sizes, and pictures of your ideas. We want your house to fit you and your treasures - proper planning from the beginning is essential. We also like to include your interior designer during this process because their input on the overall design and flow of the house can be extremely helpful.

You will receive design drawings, elevation renderings, even scale models when needed so that you can visualize your new home in all of its elegance.
